

# 6 Ways A Jolly Pops Class or Concert Can Enrich Your Students

## 1. Break From Routine

Even little kids grow tired of the same old same old. The Jolly Pops can provide that weekly, monthly or once and a while event your kids and teachers will look forward to and enjoy.

## 2. Movement

A Jolly Pops class or concert encourages movement. Our songs and games involve imaginary action and dancing that helps get the wiggles out, especially on those cold days when outside time is limited.

## 3. Music Appreciation

The Jolly Pops offer a foundation for a bright lifelong musical education. We want to make music class fun, so kids can appreciate what a great opportunity music is to express themselves and learn.

## 4. Music is a Gateway to Early Literacy

A Jolly Pops program offers kids a chance to use language and rhythm while being exposed to vocabulary development.

## 5. Core Curriculum

We touch on the core curriculum values of counting and spelling quite often. Auditory Learning is present through listening and repetition. Kinesthetic Learning can be engaged through our introduction of simple handheld instruments and our famous puppets.

## 6. Entertainment

A Jolly Pops program is a good time. Your kids and teachers will love it. We get them involved, make them laugh and engage their sense of wonder and imagination all while having a lot of fun.
